EDUCATION

University of Delaware Newark, DE
Honors Bachelor of Science May 2020
Major: *Computer Science*, Concentration: Machine Learning and Artificial Intelligence, Minor: Physics
GPA: 3.79
Dean's List: Fall 2016, Spring 2017
Relevant Coursework: Data Structures, Machine Organization and Assembly Language, Introduction to Digital Systems

The Charter School of Wilmington
High School Diploma June 2016
Relevant Coursework: Data Structures, Algorithms, Software Engineering, Web Application Development, Cybersecurity

EXPERIENCE

University of Delaware Newark, DE
Research Assistant May 2017-Present

- Designed and updated the Software Engineering Research website for the University
- Virtualized various software engineering research tools using Docker for ease of access
- Researching cost efficiency of different cloud computing platforms in a small testing team. Current projects include the *CAPT* testing suite, which has the potential to reduce cloud testing costs by 66.9%

University of Delaware Newark, DE
Computational Thinking Fellow June 2017-Present

- Selected to work under NSF funded grant to infuse "Computational Thinking" into general education university courses
- Designed courses will familiarize students of various disciplines with basic principles of computer science
- Collaborating with music professors in designing a new Spring 2018 course, Computational Thinking in Music

University of Delaware Newark, DE
Research Assistant, Vertically Integrated Projects January 2017 - Present

- Parallelized existing algorithms for GPUs and FPGAs in High Performance Computing program
- Leading a small team on a complete redesign of the UD "GuitarBot", a guitar playing robot. After refactoring, original codebase length was reduced by 55%, and current goals are to implement live recording and MIDI interpolation

Barnes and Noble University Bookstore Newark, DE
Apple Salesperson/Technology Support September 2016 – January 2017

- Facilitated sales of Apple products such as iPads and Macbooks to potential customers
- Administered technical support to university students and staff, in addition to configuring university software

ACTIVITIES

Newark Charter Middle School First Lego League Robotics Newark, DE
Coach September 2015 – Present

- Coach a small team of seven middle-school students in nationwide robotics competition
- Encourage scientific thinking and engineering skills though mentoring practical project design and small robot construction
- Won "Most Innovative Mechanical Design" in 2017 qualifiers

MOE365 First Robotics Competition Newark, DE
Lead Programming Team September 2015 – March 2016

- Reworked existing codebase from purely functional programming to a modular Object-Oriented paradigm, vastly improving development efficiency and reducing prototyping time

SKILLS

- Languages: Java, C/C++/C#, Python, Scheme, ARM, HTML, JavaScript, PHP
- Software: Windows, macOS, Linux, Chameleon, Amazon Web Services, Visual Studio, Microsoft Office Suite
